

Do you suffer from Chronic Low Back Pain?

If you are 18-70 and have suffered from chronic low back pain for more than 6 months and have had a recent MRI scan, you may be eligible to participate in a clinical trial.

Research has shown that Chronic Low Back Pain can be caused by bacterial infection and can be treated with antibiotics. Persica Pharmaceuticals is researching a new treatment for this debilitating condition.

The clinical trial will involve injecting antibiotic into your spinal disc and medical follow up for 1 year after the injections.

You will have to complete questionnaires and a diary during the study.

You will also have 3 MRI scans and blood tests during the trial.

Look up for more details in the online registry (www.clinicaltrials.gov) search for: **NCT04238676** or **Persica 002**

Are you eligible?

- Aged 18-70
- Chronic low back pain for more than 6 months
- Had a recent MRI scan
- Not aware of any other diagnosis for your back pain
- Other treatments haven't worked
- Willing to use contraception, if applicable
- Willing to participate and able to attend all hospital visits for more than 1 year

If you are interested, call or email a member of the team:

- Hospital: XXXXX
- Email: xxx Phone: XXX

Other hospitals in the UK, Spain, Belgium, France and New Zealand are also taking part in the clinical trial.

This clinical research study is sponsored by Persica Pharmaceuticals Ltd based in the UK.
